[Redacted]

Dear Hiring Manager,

I am writing to express my interest in the [Redacted] position at your company.

With a solid foundation as Technical Support and a Self-driven transition into [Redacted] I could bring a unique blend of problem-solving skills, customer-focused thinking, and technical expertise in building both desktop & web applications.

Over the past few years, I have honed my skills in [Redacted], [Redacted], [Redacted], [Redacted], & [Redacted], developing internal tools and automation workflows that improve efficiency and user experience. My background as a technical support engineer has given me a strong ability to analyze complex diagnostic logs and troubleshoot issues from an end-user perspective. These experiences have strengthened my ability to consider robust solutions and deliver applications that address real-world needs.

I like the challenges coding provides daily, so I continuously improve my craft through self-directed learning and project-based practice. I prosper in environments where I can collaborate with others, learn from experienced developers, and contribute to creating meaningful software solutions.

Feel free to review my credentials on the following page for your consideration.

It would be such a privilege to discuss the position in more detail with you soon.

Thank you for your time & I'm looking forward to hearing from you.

Self-trained software engineer transitioning from a technical support background, with hands-on experience building desktop and web applications using , , &
